PSC APPROVES TIMBER CREEK APPLICATIONS

JEFFERSON CITY—The Missouri Public Service Commission has approved applications filed by the Timber Creek Sewer Company authorizing the company to provide sewer service in two areas of Clay County near Liberty, Missouri. The Timber Creek Sewer Company will provide sewer service to the Oakbrook Subdivision and to a proposed residential development known as the Johnson Ridge Subdivision.

Timber Creek proposes to charge residential customers \$26.97 a month for sewer service, the same rate the company currently charges its residential customers in Platte County.

On November 22, 2005, the Staff of the Missouri Public Service Commission filed a memorandum recommending the Commission approve the application. Staff states there is a need for the proposed service, that the company is qualified, and that it has the financial ability to provide the proposed sewer service. The company has approximately 900 customers and is financially sound. Staff believes the company has demonstrated the technical and managerial ability to develop and operate sewer systems.

Based upon the application and the Staff's recommendation, the Commission has approved the applications filed by the Timber Creek Sewer Company.
